

Excerpt from Montgomery Gazette

Monday, November 28, 2011

Also, Sheladia Associates of Rockville, an engineering, architecture and development company, contracted with two Indian companies — M/S Sai Matarani Toll Ways and Gayatri Projects — to provide design and project management services for \$3.7 million to help upgrade the Panikoili-Rimouli Section of National Highway 215 to a four-lane roadway in the state of Orissa on India's east coast.

In another Montgomery County deal, Executives with Amarex, a clinical research organization in Germantown, signed an agreement with Shreis Scalene Sciences of Gaithersburg to secure U.S. regulatory approval for a medical device called Cytotron, which is designed to treat regenerative and degenerative diseases such as cancer, osteoarthritis and multiple sclerosis. The device was invented and developed by Rajah Vijay Kumar, chairman of Scalene Cybernetics in Bangalore, a technology and equity partner of the Gaithersburg company.

“This trip represents a continuation of Montgomery County's reaching out in the global economy,” County Executive Isiah Leggett (D) said in the statement. “Our emphasis remains on the cutting edge of biotechnology and the life sciences in terms of attracting investment, business and good jobs.”
